

[SM-LSM-002] local site mover upgrade

In order to upgrade the local site mover installation you need:

1. follow [SM-LSM-001] local site mover installation to deploy a new version in AFS
2. increment the LSM_VERSION variable in the **setup.test.sh** file
3. increment the LSM_VERSION variable in the **setup.test.pilot.sh** file
4. follow [SM-LSM-003] local site mover test
5. follow [SM-LSM-004] local site mover pilot integration testing
6. follow [SM-LSM-005] local site mover validation
7. **[after validation]** increment the LSM_VERSION variable in the **setup.sh** file
